GT4 Component Fact Sheet

Credential Management

Last updated: 19 July 2004

General Component Description

This component contains tools and services related to managing and creating credentials. It currently consists of

- *SimpleCA:* a set of tools designed to allow users to easily create a new certificate authority for use with GT
- *MyProxy*: an online credential repository (contributed by NCSA)

What's New in GT4?

- No new features have been added to SimpleCA
- The MyProxy contribution is a new addition to the Globus Toolkit®

Backward Compatibility Statement

- SimpleCA maintains backward compatibility with previous versions of the toolkit

Technology Dependencies

- SimpleCA depends upon the GT4 Pre-WS Authentication & Authorization components
